Re: Carney's Community

To whom it may concern

England Boxing is the National Governing Body for the sport of Boxing, we provide much needed services, resources and support to clubs, schools and recreational sessions throughout the nation. England Boxing's main objectives are to focus on club support and growth for what has become the UK's fastest growing sport since the Olympic Games London 2012.

As the England Boxing Club Support Officer for the London region, I am writing to express my support for Carney's Community; I am in full support of their developmental plans for growth and community outreach. I can confirm we will work in partnership with Carney's Community to help support the club, set-up, funding bids and physical activity service towards the goals of the project and contribute in-kind towards its success.

Boxing has proven to be popular and successful in engaging older people, young people and women/girls in South London and has demonstrated the need and demand for this type of project. Boxing has a unique appeal and ability to attract all ages, abilities and fitness levels into physical activity and therefore we continue to support the growth of this activity in London with partners such as Carney's Community.

England Boxing would like to endorse any application for funding and offer any grant support available to a committed project and potential boxing club

Yours faithfully

Richard Powers
